DETAILED ACTION

Election/Restrictions

Claims 1-32 are pending in this application.

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

a) Species I, e.g. claims 1-5 and 6-9: Method for depositing metal on a semiconductor device having a substrate, an exposed first surface and an exposed second surface by applying a second voltage for removing metal ions from the exposed first surface without retaining metal ions on the exposed second layer.

b) Species II, e.g. claims 10- 15, 16- 20 and 21-24: Method for depositing metal on a semiconductor device having a substrate, an exposed first surface and an exposed second surface by applying a second voltage/second duty cycle for removing metal ions (copper) from the exposed first surface with retaining metal ions (copper) on the exposed second layer.

c) Species III, e.g. claims 10- 15, 16-20 and 25- 28: Method for depositing metal on a semiconductor device having a substrate, an exposed first surface and an exposed second surface by applying a second voltage/second duty cycle for removing metal ions (nickel) from the exposed first surface with retaining metal ions (nickel) on the exposed second layer.

d) Species IV, e.g. claims 10- 15, 16-20 and 29- 32: Method for depositing metal on a semiconductor device having a substrate, an exposed first surface and an exposed second surface by applying a second voltage/second duty cycle for removing metal ions (palladium) from the exposed first surface with retaining metal ions (palladium) on the exposed second layer.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claims is finally held to be allowable. Currently, claims 10 and 16 are generic claims in Species II to Species VI. Applicant(s) is(are) advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is all claims are generic is considered non-responsive unless accompanied by an election.

3. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. 1.141. If claims are added after the selection, applicant must indicate which are readable upon the elected species. M.P.E.P. 809.02(a). Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filled petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(h).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dung A. Le whose telephone number is (571) 272-1784. The examiner can normally be reached on Monday-Friday 8:00am- 4:30pm.
